Competitive edge through Trainings

- ✚ Increase in the productivity of employees and ensure the customer needs are addressed on time within the allocated budgets. Scaling up employee through training and crossing barriers which enables the company to concentrate on expected deliverables.
- ✚ It's also important that the quality translation of knowledge is resulting in tangible results which increases the productivity, improved performance and reduced recruiting costs.

Achievements

- ✚ Over 97% of our clients utilize knowledge and skills gained in the classroom on the job.
- ✚ And more than 50% of performance improvements realized on the job are directly attributable to the training obtained in our classrooms

Skill up gradation program

- ✚ T Group has developed courses for skill up-gradation of employees at all levels. We have courses to upgrade technology skills, courses to upgrade from a lower version to higher versions and courses to deepen the understanding of self-learnt concepts
- ✚ The courses at T Group are designed and delivered by experts who have in-depth understanding of the subject and great instructional ability to powerfully translate the ideas.
